

COME JOIN OUR LOVE COMMUNITY PTA ART DOCENT PROGRAM

We need volunteer support in and outside classrooms to give our kids an enriching, educational, and enjoyable journey into the world of art.

You don't have to be an artist or an art teacher to be part of our Art Docent Program. You don't even need to speak in front of a class if you are uncomfortable doing so. We have curriculums, video demos, all kinds of art resources and materials available to help.

Art enrichment is important because creativity is the foundation of a child's education. It helps develop motor skills, eye-hand coordination and has a large impact on their social and emotional growth. It also enhances their cognitive development which can have a positive effect on math skills and other related subjects.

Look out for more updates and info night information in the September PTA newsletter via Parent Square or submit a query on the school website under the PTA Art Docent program page. You can also contact us directly at artdocent@lovepta.org
